

refurbishing furniture
reviving communities

Our History

KFR was formed in April 2013 following a merger between the Kennet Furniture Project and Refurbiz.

The Kennet Furniture Project began in 1995 with the aim of helping disadvantaged families by collecting unwanted furniture and selling it at a low cost, at the same time as training volunteers and improving the environment.

Refurbiz started in 2003 with similar aims but focussing on white goods such as cookers and washing machines.

Over the years our work overlapped more and more. We shared a building in Devizes and we often borrowed each other's vans. It was therefore decided to join forces. We moved into new premises in the Hopton Industrial Estate in April 2013. Together, KFR cover all of Wiltshire and Swindon.

Today we help 1000's of people a year rehome their preloved furniture and white goods, we then find them a suitable home making them reloved once more.

KFR's mission is to:

- Refurbish furniture and white goods so that quality items are available to families with limited income
- Revive communities by removing unwanted items, reducing landfill and retraining people with new skills.
